### Covid-19 & Sierra Leone

**Covid 19 today’s figures:** 4,433 confirmed cases with 82 recorded deaths and 3,191 recovered

### Momoh – the latest news

The roof is now completed. They will now render the building & concrete the floors & the windows and doors will be fitted this coming weekend.

I am also looking at the cost of putting in a concrete ramp to form a wheelchair access.

There have been delays due to the rainy season. Pastor Mark has been away for a week. I am sending more funds and things should progress rapidly now.

### Banbury International Community School

The well at the school was installed in 2017 and we have just undertaken some refurbishment work to improve the water quality. As you can see the girls are really pleased with the result.

We are also undertaking repairs & replacement of some of the classroom furniture and have undertaken repairs to the water harvesting systems

### Calvary Praise Academy

They have reached the water table at 13 metres (40 feet) and last week I sent additional funds so work can continue. I have heard today that they have now concreted nearly halfway up from the water table so things are progressing well – no pun intended!!

### Liverpool Community School

We are undertaking a refurbishment programme at the school which includes the cleaning of all the water harvesting Jo-Jo tanks, repairs to the water harvesting systems, undertaking repairs and replacement of some of the classroom furniture and we have just completed a refurbishment of the well which included increasing the depth in order to improve water quality.
